The Child's World®
Bringing the World to Young Readers

We love readers and we love reading.

The Child's World brings a world of educational titles to young readers in school and public libraries everywhere.

Every child deserves the opportunity to explore and learn about the world around them. That's why we carefully create content that is both educational and engaging, covering topics like early childhood literacy and social emotional learning, as well as state standards in language arts, social studies, STEM, and more.

Since our beginnings in 1968, our goal has remained simple: we want all children to truly enjoy reading and learning. We hope our books will provide young readers with an experience true to our mission.

Learning Sight Words

Sight words are a foundation for reading. Because sight words can't be easily sounded out, young readers must memorize them. This series helps young readers learn essential sight words through fun stories. The sight words are repeated on each page to help readers recognize and memorize them. Words highlighted in the books come from the Dolch sight words lists. Bright pictures provide visual cues to help the reader. Additional features include a word list, an introduction to the author, and a note to caregivers and educators.

My Day Readers

Every child has a story to tell about his or her day. Each title in our My Day Readers series is a simple, fictional story about a special day in a child's life, with a close tie to a commonly studied early childhood curriculum theme. Each story begins with a child sharing the activities of his or her day, and then moves into a third-person tale of the day's experience. Each story will delight young readers while also conveying basic information about a curriculum topic. Carefully leveled text and matching photos make these books decodable for emerging readers. Additional supports include a phonetic glossary, extended learning activities, and sources for further research. The My Day Readers series is a perfect way to combine reading instruction with core curriculum concepts.

Take It Apart

In areas of libraries and classrooms called makerspaces, students construct, assemble, and create things. In breakerspaces, they do just the opposite—taking things apart to discover how they work. This series introduces readers to the breakerspace concept, encouraging them to learn how everyday household objects function. Each title highlights a different object, how to safely take it apart, and how its parts work together. Labeled photos of the disassembled objects make each step of the process clear. MELANIA KNAUSS TRUMP
Melania Knauss Trump is the second First Lady born outside of the United States (the first was John Quincy Adams's wife, Louisa, who was born in England). Melania Trump became a naturalized US citizen in 2006.
Melania was born in Slovenia, formerly Yugoslavia. She grew up in Sevnica, a small, picturesque town in the mountains. In high school, Melania studied in the capital city of Ljubljana, and she soon began working as a model.
In 1996, Melania moved to Manhattan to further her modeling career. She met Donald Trump at a party in 1998, and they began dating soon afterward. The couple married in Florida on January 22, 2005.
Melania Trump is a quiet, private person. Children's issues are important to her. In 2018, as First Lady, she began the Be Best campaign. Its mission focused on children's health and well-being, including promoting online safety practices and combating drug abuse.
CHAPTER FOUR
THE PRESIDENCIES
Donald Trump was busy after his election. Soon he and his wife, Melania, flew on their private jet to Washington, DC, to meet with the Obamas at the White House. In the days that followed, Trump received intelligence briefings and selected staff and cabinet members, including the heads of 15 executive departments, from Agriculture to Veterans Affairs.
Trump was sworn in to office at the US Capitol on January 20, 2017, in front of hundreds of thousands of people. In a speech, he outlined his vision: "From this day forward, it's going to be only America first." He did not feel bound by old commitments to other nations as other presidents had before him.

Food and Fun
Christmas wouldn't be the same without cookies, fudge, and other goodies. In North America, many families have a large Christmas dinner. They often eat turkey, mashed potatoes, and cranberry sauce. In Norway, preserved codfish called lutefisk (LOO-tuh-fisk), is a popular Christmas dish. People in Great Britain often serve goose or turkey with potatoes and Christmas pudding. Sometimes, the pudding holds coins or charms for children.
British children also like crackers. These crackers are not a food. A cracker is a colorful paper tube that is twisted at both ends. When the twists are pulled, the cracker goes pop! and small toys fall out of the tube.

The Scoop on Superstitions

Cultures around the world have their own superstitions surrounding good and bad luck, which often cause people to adjust their everyday actions. Some may think black cats bring good fortune, while others try to avoid crossing a black cat's path. People may cross their fingers when lying to avoid bad luck, while others hang up horseshoes to capture good luck. Each book in this series introduces readers to a specific superstition, how the superstition developed, and how it affects people today. Additional features include a table of contents, a fast facts section, critical-thinking questions, a phonetic glossary, an index, an introduction to the author, and sources for further research.

In the late 1980s, the NBA wanted to add more teams. It wanted one of the new teams to be in Florida. The Sunshine State did not have an NBA team yet. The league could not decide between two Florida cities: Miami and Orlando. So it decided that each city would get an expansion team. Miami began play in the 1989 season.
In 1992, the Heat's fourth NBA season, Kevin Edwards tried to get past a Houston Rockets player.
